Reasons for allowance

2. Claims 1-28 are allowed.

The following is an examiner's statement of reasons for allowance: Prior art teaches a method of performing downstream adaptive modulation in an MMDS, broadband, fixed wireless communication system having a base station with a transmitter-receiver and one or more CPE devices each having a transmitter-receiver, the system utilizing a DOCSIS MAC pursuant to which the DPU is a variable length, Ethernet-type data packet. However, the prior art fails to teaches the operating the base station to transmit data downstream to the CPE devices in a plurality of data modulation

modes, assigning one of the modulation modes to each respective CPE device, monitoring the quality of downstream data transmission to, and reception by, each CPE device, and if the quality of downstream data transmission to and reception by any CPE device receiving data in its assigned modulation mode lies outside a predetermined quality range, assigning a different modulating mode to such CPE device, the different mode rendering the data transmission quality within the predetermined quality range, wherein the monitoring step is effected by monitoring and analyzing upstream messages from the CPE devices.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
